

Define Chart Default Fonts

Background

For some Asian languages only certain types of fonts would look good in charts so an administrator can now add desired fonts to the User Preference font selection menu by following the steps below. This feature is only available for Analyzer version 3.0.2361 Hot Fix 1 or later. Please note that changes will only affect newly created report, this does not change existing reports.

Configuration Steps

1. Specify the Japanese fonts to use in program files\analyzer\web\config\chartattrdef.config

web > config

Name	Date modified	Type	Size
chartattrdef.config	4/20/2017 12:11 PM	CONFIG File	904 KB
chartattrs.config	1/13/2015 2:34 AM	CONFIG File	2 KB
chartpalettes.config	8/16/2006 10:14 AM	CONFIG File	3 KB
chartpalettes2.config	1/5/2017 10:14 PM	CONFIG File	6 KB
chartpalettes3.config	6/7/2007 3:18 PM	CONFIG File	3 KB
completedesc.config	3/7/2013 7:28 AM	CONFIG File	1 KB

2. Add desired Japanese fonts to AvailableFonts section. Example here shows two Japanese fonts are added to AvailableFonts. Saved the file then recycle Analyzer application pool for the changes to take effect.

```
File Edit Format View Help
<?xml version="1.0" encoding="utf-8" ?>
<ChartAttributes>
  <AvailableFonts>Arial,Courier New,Impact,Tahoma,Verdana,MS P明朝,細明朝体</AvailableFonts>
  <AvailableFontSizes>8,9,10,11,12,14,16,18,20,22,24,26,28,36,48,72</AvailableFontSizes>
  <Categories>
    <Category Name="Animation">
      <Translations>
        <Translation LangId="0" Caption="Animation" />
        <Translation LangId="1" Caption="動態顯示" />
        <Translation LangId="2" Caption="动态显示" />
      </Translations>
    </Category>
  </Categories>
</ChartAttributes>
```

3. Login to Analyzer. Go to the **User Preferences** section. Now you should see them under the **Chart Default Font** selection
