Strategy Companion

Strategy Companion Analyzer 3.0.2361 HotFix2 Release Note Change History

Item	Description	Comments
1	(Modify) API	Updated ExportReportSnapshotEffective and ExportReportSnapshot API internal timeout value to max value of 5 hours.
2	(Bug Fixed) API	Fixed 3 issues for ListAccessibleReportForUser() function: 1: Report access privileges can now be changed by the owner while the report is still inside the My Reports folder. 2. If a non-owner tries to assign privilege while the report is still inside the My Reports folder no longer causes problem (unable to return the correct list). 3. Includes user's report inside first level of the Shared Reports folder even the user does not have access to the Shared Reports folder.
3	(Bug Fixed) System	Fixed an issue where multiple log files are created from the same dbo.Logs table (due to unable to clear dbo.Logs table). Also logs file now only will be saved to the main (1st) Anayzer server. Multiple attempt will be run to clear the Logs table if unsuccessful (while doing so Analyzer will continue to record events in the Logs table correctly).
4	(Bug Fixed) Report	Fixed an issue where changing the window size after toggle between Report Layout (dashboard and list view) cause blank to be displayed.
5	(Enhancement) Pivot	Calculation Members on axis now are sorted by name (previously it is unsorted).
6	(Bug Fixed) Subscription	Fixed an issue where the following error randomly appears after sending scheduled report multiple times (normally over 100+ times) with send interval set to be one minute. "you must provide a request body if you set contentLength>0 or sendChunked==true... "
7	(Bug Fixed) System	Fixed an issue where enabling SeRelabelPvivilege policy causes Audit Failure in Windows Event Log.
8	(Bug Fixed) Browser	Change Desktop Default Font Scale to be 1.03 in ReportFont.config to solve table misalign issue in Microsoft Edge brower.
9	(Bug Fixed) System	Fixed Session Timeout issue after user clicked on the Logout link.

10	(New Feature) API	API: ExportReportSnapshotEffective() function now takes Null as value for the options parameters to use user configured export settings.
11	(Bug Fixed) Chart	Correct an issue where once User Preference Default Font is selected that caused all Chart Attribute settings to be ignored.
12	(Enhancement) Export Excel	Added trace information to Excel Export.
13	(New Feature) API	Added new API: GetExportOptions(SecurityContext context, int reportId) to retrieve current user export settings.
14	(Bug Fixed) Pivot Table #3774	Fixed an Quick Filter issue where caused by user changed UI Language while Quick Filter has more than 500 members.
